MMARS Jux™ Group Summary Reports (a few examples; not an exhaustive list)

Jux™ is short for “juxtaposition”.

It’s our tool that effortlessly re-organizes your view of the data to show the side-by-side comparisons you want.

Report Heading (Student List)

The purpose of this page is to describe the common elements shown in the heading on the variety of Student List reports. These elements identify the general content and organization of the report, and appear on reports for any test, regardless of the publisher, or the subjects or scores being reported.

SBAC Student List with Claims
Subject: ELA/Literacy
(filtered) Significant Subgroups: ~Economically Disadv YES

Testing Group		Reporting Group	
Year:	2016-17	Roster:	2017-18 rosters

School:	GRANT MIDDLE	Period:	Period 1
Teacher:	LUNSFORD, LESLIE		

Student List Report Headings

- 1 This is the report title, shown both on-screen in MMARS, and on the published reports.
- 2 The subject name, if the report contains scores for only one subject. Otherwise, the subject names are displayed above the columns in the body of the report.
- 3 If the report has been filtered by subgroup criteria, the name of the subgroup will appear here.
- 4 The **Testing Group** contains the year, term, and grade-level(s) of the group when tested. *Important Note: MMARS *always* reports the scores as-of the grade when the students were tested.*
- 5 The **Reporting Group** contains the grouping of students, as organized / rostered for this report. This may be as-tested ("Per Publisher") - meaning exactly the way the students were organized in the raw data file downloaded from the publisher. This may also be a customer-supplied roster using the as-tested or new-year classrooms.

Regardless, per #4 above, the grade-level will be as-tested. For example, a 2018-19 roster for a 5th grade teacher will show her students on SBAC test results as Grade 4, because they tested last spring as 4th graders.

Student List Report Components

- 1 The student's surname, then firstname. Reports for multiple years or multiple subjects are always sorted on this name.
- 2 The student's local ID number, assigned by the LEA. If this is not included in the data for State tests, we can display it, if you supply us with rosters containing both ID numbers.
- 3 Test Admin is the term when each instance of the test was administered.
- 4 The colored column is the primary or anchor score for this report. Reports generated for a single year or term can be sorted/ranked by this score, either high-to-low, or low-to-high.
- 5 Other scores for this same subject are offered to provide more detail about the student's achievement and change/growth. This section includes scores supplied by the publisher, as well as our proprietary metrics and quantified change scores.
- 6 Claim or cluster/goal/domain scores are provided on select reports. The display will show the primary score offered by the publisher, typically a performance level or scale score.

Due to space limitations, scoretype and claim names are abbreviated on reports. If you're not familiar with the acronyms, please ask, or refer to our glossary of scoretypes.

Report Heading (Summary Results)

The purpose of this page is to describe the common elements shown in the heading on the variety of Summary Charts. These elements identify the general content and organization of the report, and appear on reports for any test, regardless of the publisher, or the subjects or scores being reported.

Summary Report Headings

- 1 This is the report title, shown both on-screen in MMARS, and on the published reports.
- 2 If the report has been filtered by subgroup criteria, the name of the subgroup will appear here.
- 3 If this is a Jux™ comparison, the sub-title will show the Primary and Secondary Jux™ compare parameters. On an Average score comparison, the organization is always Subjects by Years, and is not displayed in the sub-title.
- 4 This breakout is not in the heading, per-se, but shown to demonstrate the relationship between the Jux™ parameters listed in the sub-title and their manifestation in the chart itself, under the X-axis. See the next page (Chart Legend) for explanations.
- 5 If not already identified in the report sub-title, or the Jux™ parameters, the **Testing Group** contains the year, term, and grade-level(s) of the group when tested. *Important Note: MMARS *always* reports the scores as-of the grade when the students were tested.*
- 6 The **Reporting Group** contains the grouping of students, as organized for this report. Students are reported in the school where they tested, except when summarizing by a teacher roster for a new school year, where the students have matriculated.

Chart Legend, Body, and Axes (Summary Results)

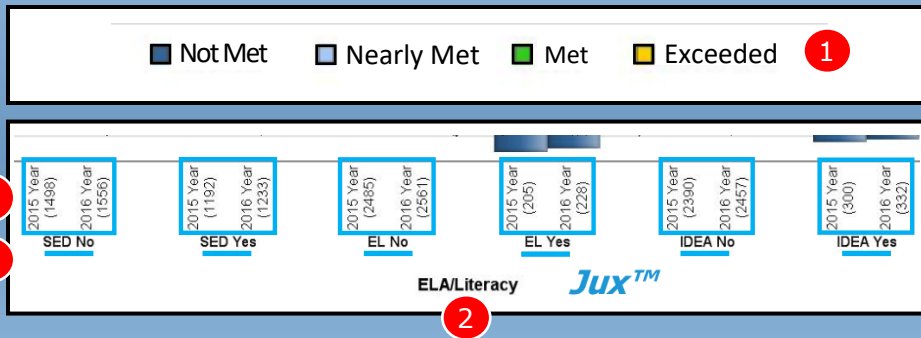

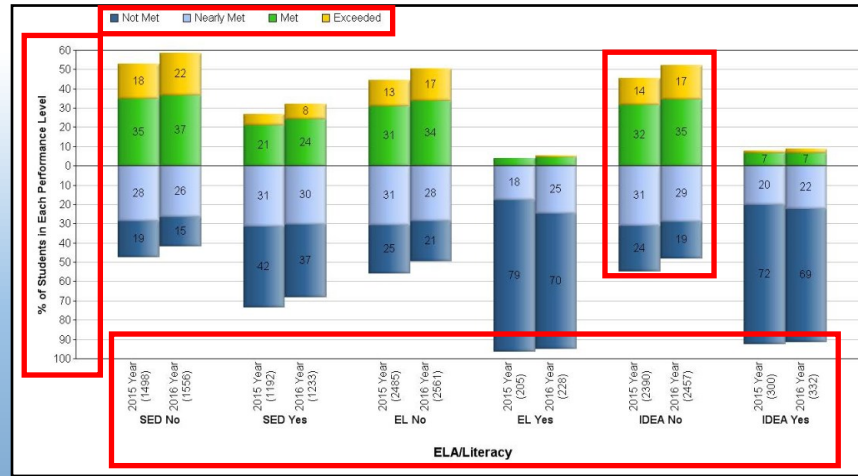

Chart Legend and X-axis

- 1 The legend at the top left of the report shows the titles of the various Performance Levels, as defined by the test publisher. Colors will be matched to publisher reports, if possible.
- 2 The subject (or claim/cluster) name, if the page contains scores for only one subject.
- 3 This is the PRIMARY Jux™ compare element/group.
- 4 This is the SECONDARY Jux™ compare element/group. This collection of elements repeats for each PRIMARY group. The figures shown represent the COUNT of students for the complete bar above the label.

Chart Body and Y-axis

- 5 Each bar of the chart represents a frequency distribution of the collection of students. Each bar contains a series of different colored segments to indicate various levels of achievement or growth. The colors are matched to the legend in the upper-left of the chart (see #1).
- 6 The number displayed on each segment is the PERCENT of students in that segment. Note that, due to rounding, the sum of the segments may be less than or greater than 100%.

The number displayed on each segment is the PERCENT of students in that segment. Note that, due to rounding, the sum of the segments may be less than or greater than 100%.

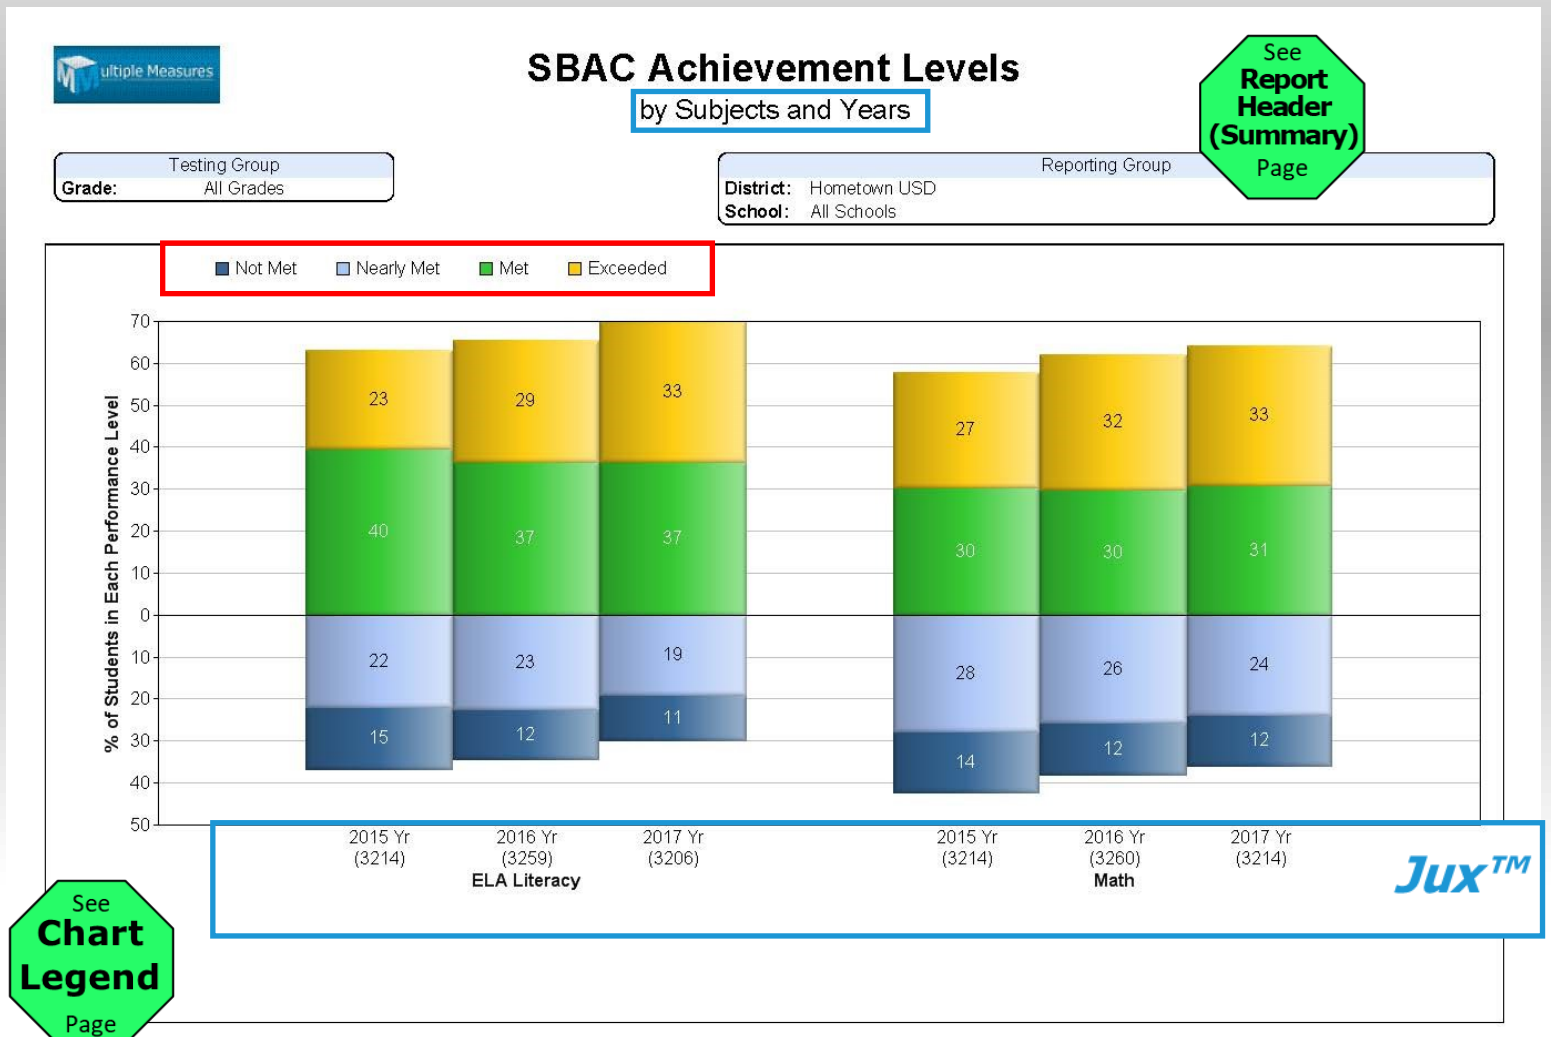

- 7 When the metric or score being measured has a cut point to define proficient, mastery, or at/above standard, the chart will be built with a “zero” line near the middle, that delineates the groups of students above and those below.
- 8 This same “zero” line is used with growth/change scores to differentiate between improvement and decline.

This report compares, for **each subject**, the achievement of the set of students tested for **each year**. This is not a cohort report; it represents somewhat different groups of students for each year.

The districtwide achievement on this report (all schools, all grades) shows gains in the percent of students who were above standard.

- ❖ Achievement Levels
- ❖ Primary Jux™ = Subjects
- ❖ Secondary Jux™ = Years
- ❖ Available in many Jux™ configurations by Subjects, Years, Schools, Grades, Subgroups, and Teachers

This report compares, for each subject, the achievement of *approximately* the SAME set of students tested for each year. This is a cohort report, using the definition deployed by CDE. These are not matched per student, but by “Class of 20xx”. This represents the same general group of students, as they move from grade to grade, but does not adjust for mobility.

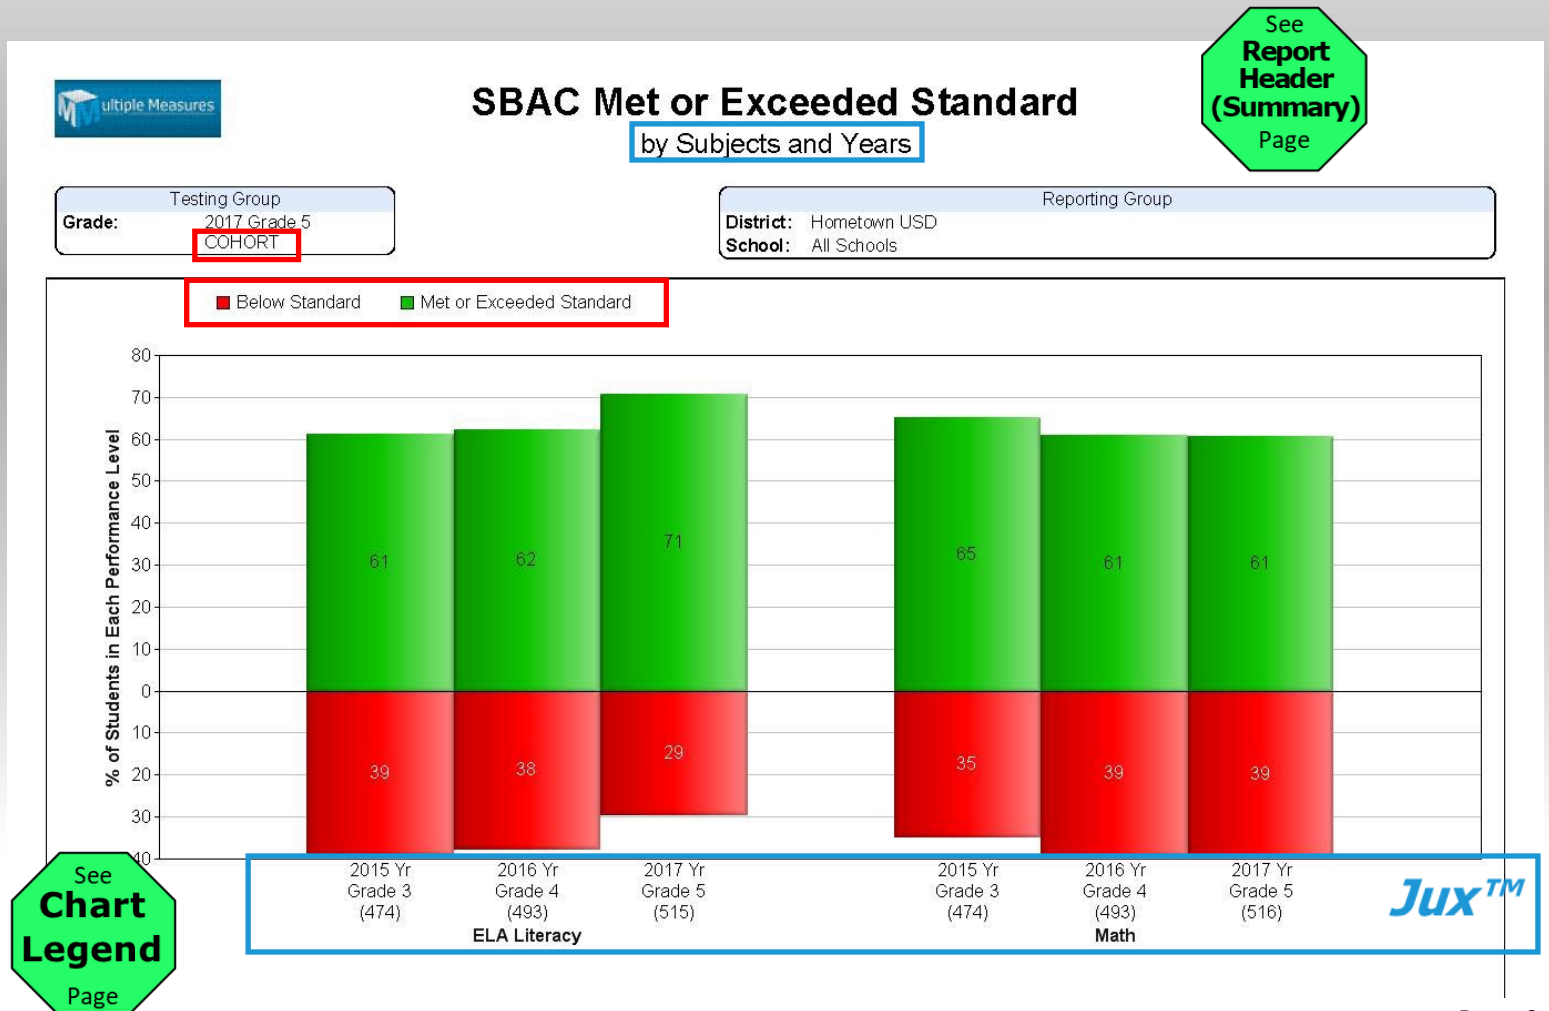

The Grade 5 cohort, districtwide (all schools) shows gains for this group in ELA, but a decline in Math.

❖ Met or Exceeded Standard

❖ Primary Jux™ = Subjects

❖ Secondary Jux™ = Years (by Cohort)
Cohort reports can be run only when the Secondary Jux™ = Years

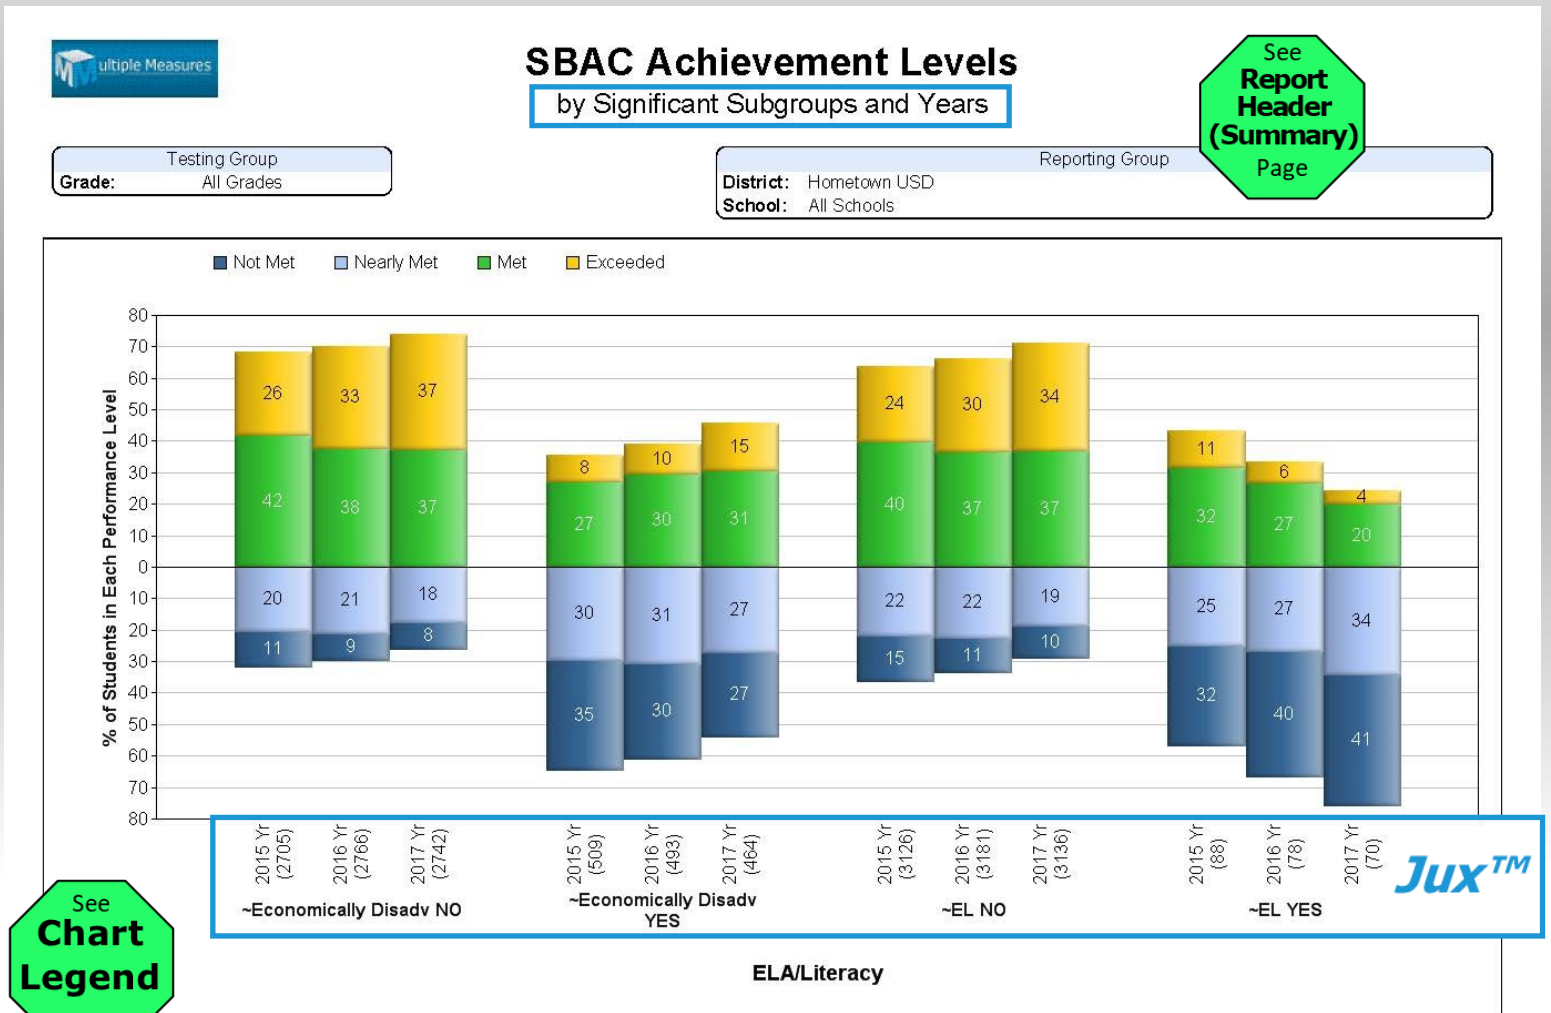

❖ Available in many Jux™ configurations by Subjects, Years, Schools, Grades, Subgroups, and Teachers

This report compares, for **each subgroup**, the achievement of the set of students tested for **each year**.

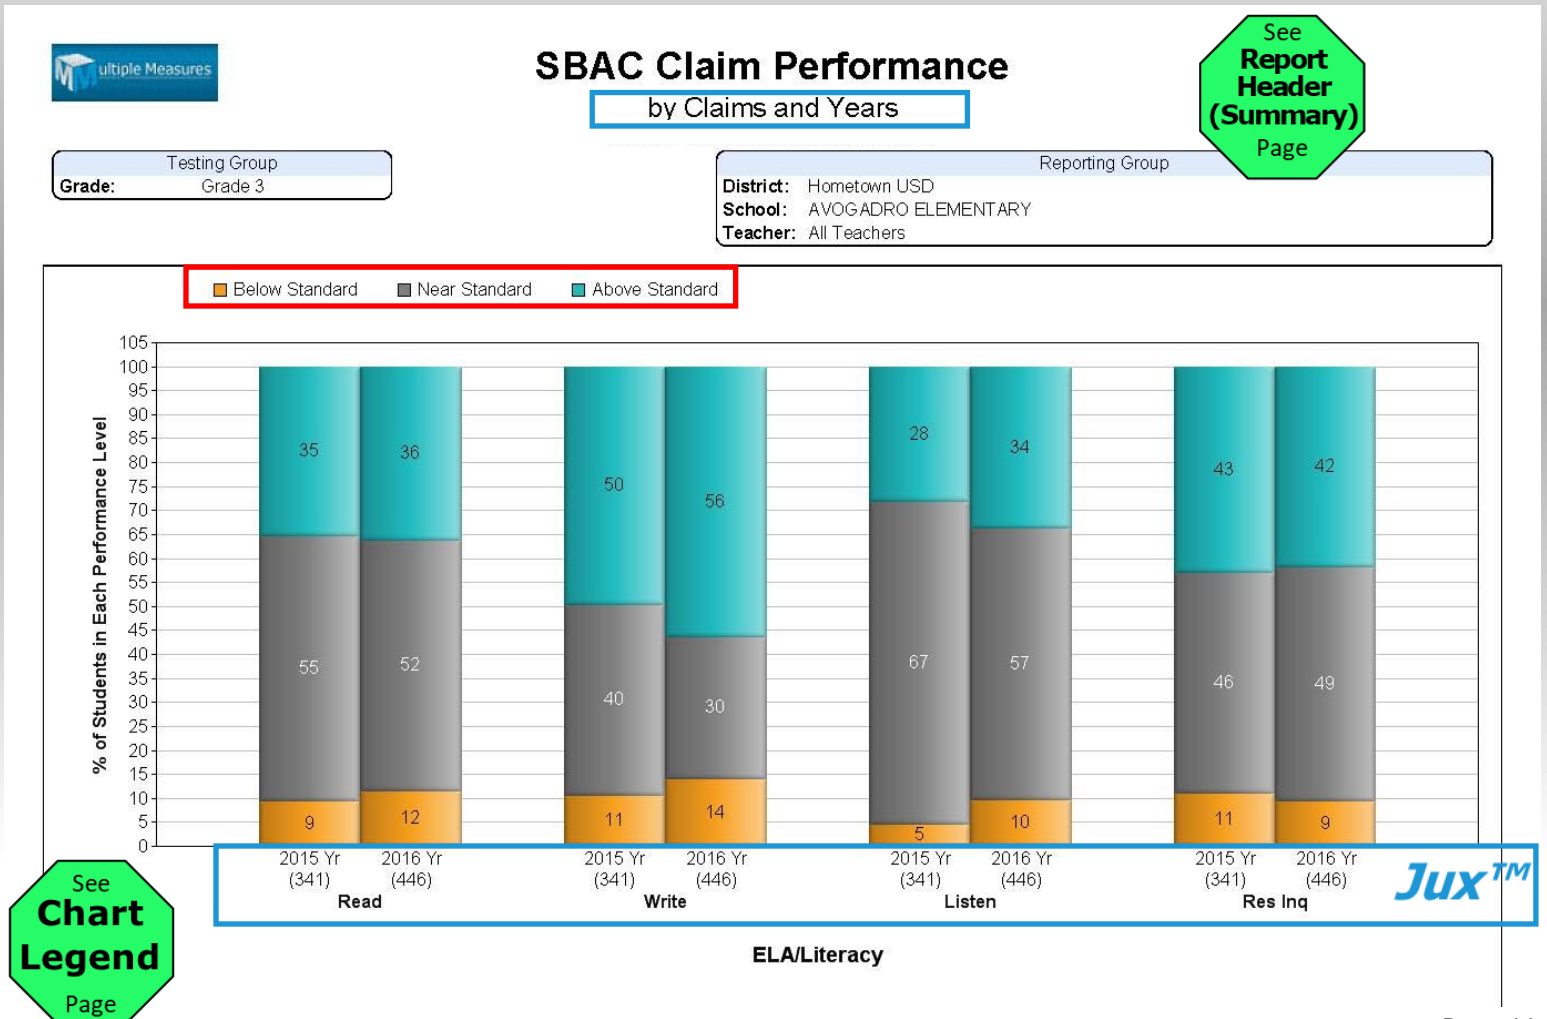

The districtwide achievement on this report (all schools, all grades) shows gains in the percent of students who were above standard for 3 subgroups, but a loss for the EL students.

- ❖ Achievement Levels
- ❖ Primary Jux™ = Significant Subgroups
- ❖ Secondary Jux™ = Years
- ❖ Available in many Jux™ configurations by Subjects, Years, Schools, Grades, Subgroups, and Teachers

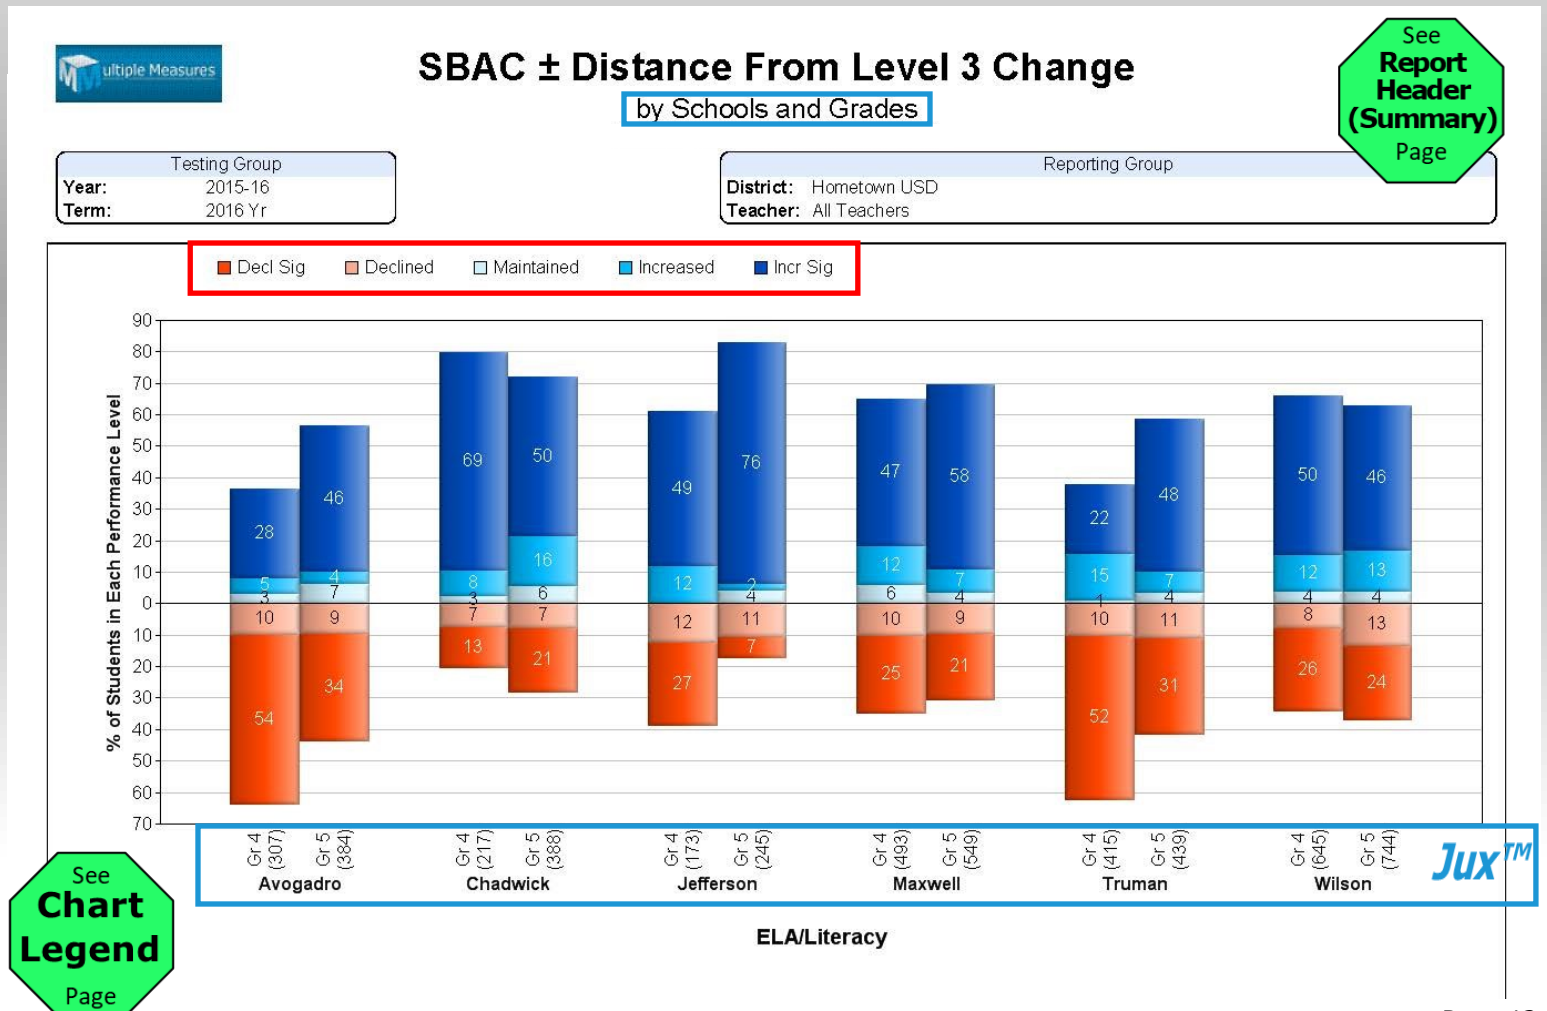

This report compares, for **each claim**, the achievement of the set of students tested for **each year**.

- ❖ Claim Performance
- ❖ Primary Jux™ = Claims
- ❖ Secondary Jux™ = Years
- ❖ ELA and Math are displayed on subsequent pages
- ❖ Available in many Jux™ configurations by Claims, Years, Schools, Grades, Subgroups, and Teachers

This report compares, for **each school**, the CHANGE in the Distance From Level 3, of the set of students tested for **each grade**.

- ❖ Distance From Level 3 Change
- ❖ Uses CA Dashboard cut-points for the 5 levels of change
- ❖ Primary Jux™ = Schools
- ❖ Secondary Jux™ = Grades
- ❖ Available in many Jux™ configurations by Subjects, Years, Schools, Grades, Subgroups, and Teachers

This report compares, for **each subject**, the CHANGE in the Fractional Performance Level™, of the set of students tested at **each school**.

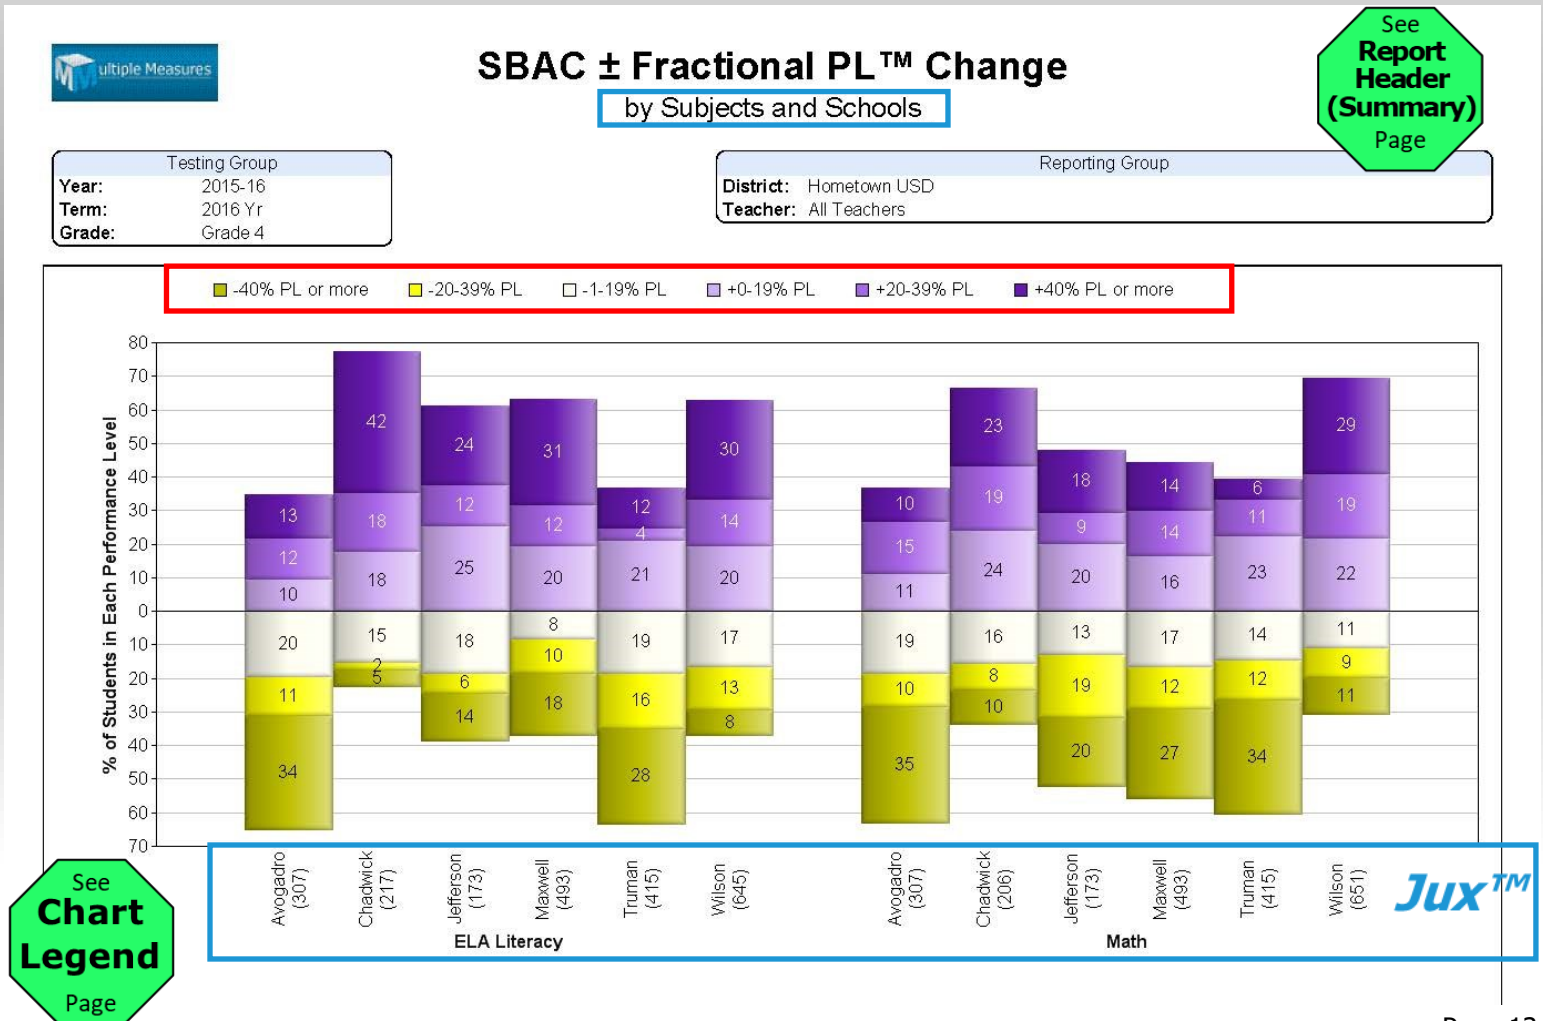

❖ Fractional Performance Level™ Change

❖ Uses 6 thresholds of “between the bands” change

❖ Primary Jux™ = **Subjects**

❖ Secondary Jux™ = **Schools**

❖ Available in many Jux™ configurations by Subjects, Years, Schools, Grades, Subgroups, and Teachers

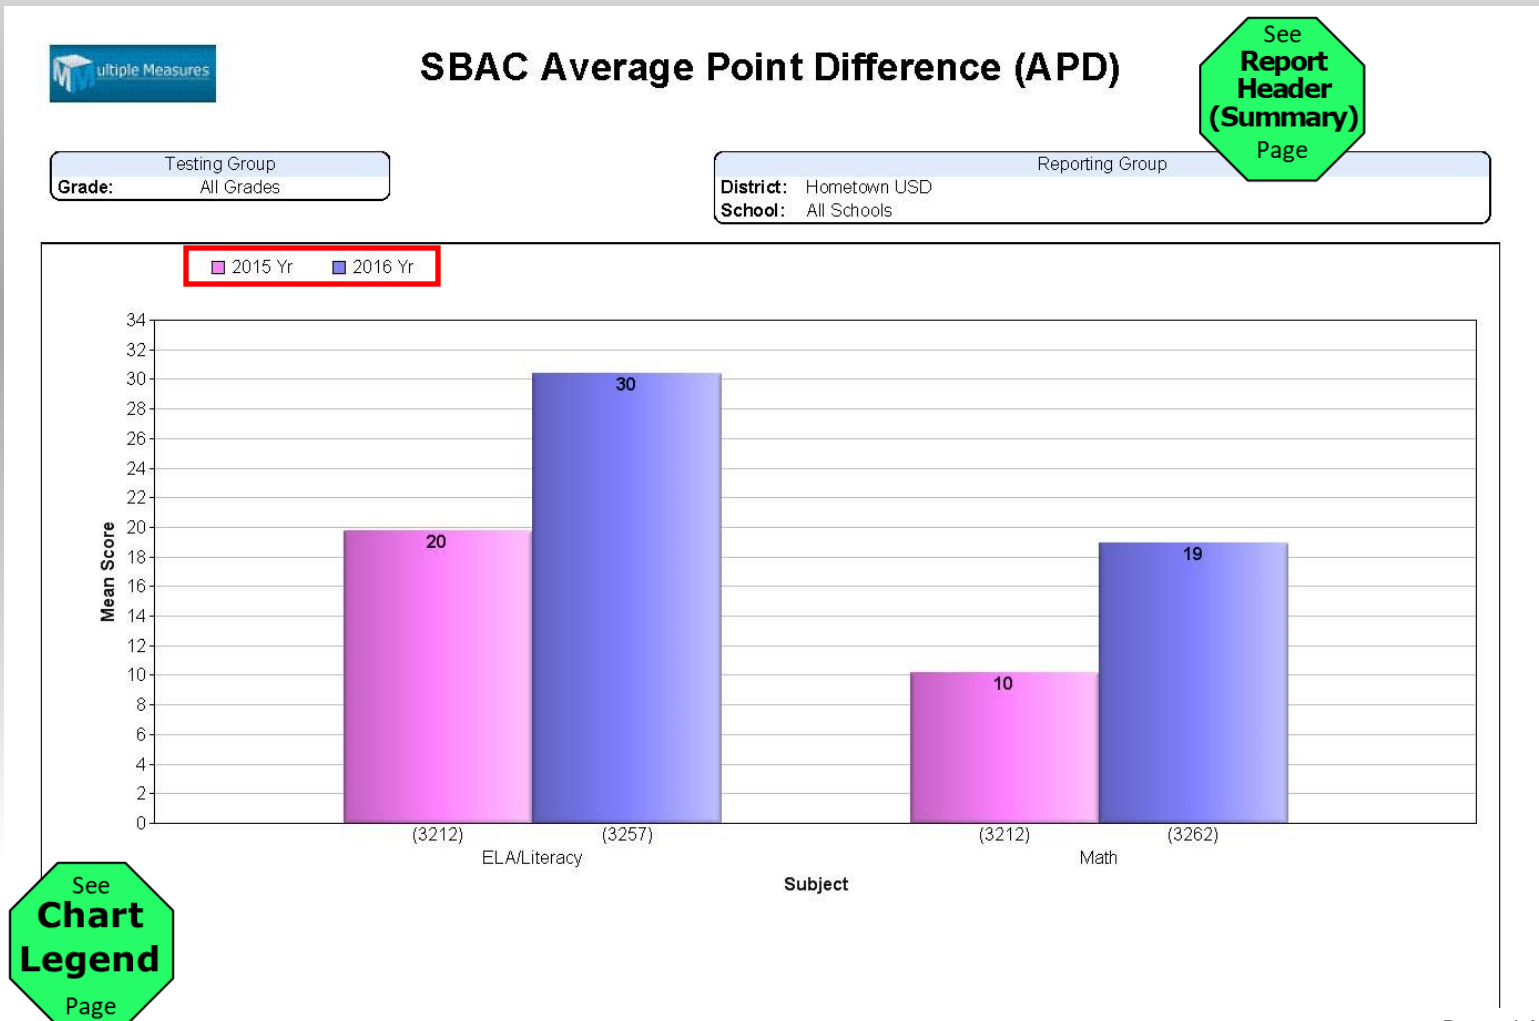

This report compares, for **each subject**, the Average Point Difference (*aka Distance From Level 3*) of the set of students tested for **each year**.

❖ **APD—Average Point Difference** (aka Average Distance From Level 3)

❖ Includes ALL students ... this does NOT employ the special California Dashboard inclusions/exclusions and special accountability subgroup definitions.

❖ Average Reports compare: **Subjects by Years**

❖ Available in many configurations by Schools, Grades, Subgroups, and Teachers

A few more examples of possible Jux™ orientations ...

This report compares, for **each year**, the achievement of the set of students tested for **each grade**.

- ❖ Achievement Levels
- ❖ Primary Jux™ = Years
- ❖ Secondary Jux™ = Grades
- ❖ Available in many Jux™ configurations by Subjects, Years, Schools, Grades, Subgroups, and Teachers

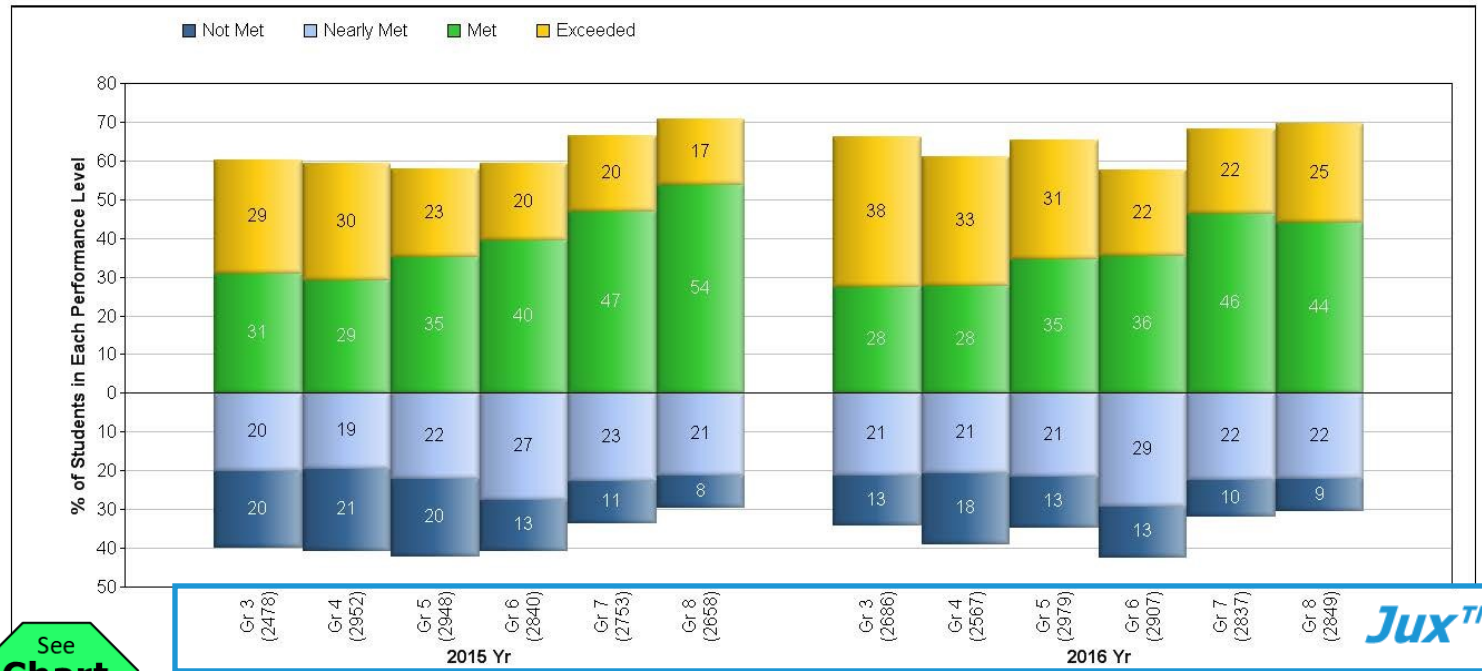

SBAC Achievement Levels

by Years and Grades

See Report Header (Summary) Page

District: Hometown USD
School: All Schools

See Chart Legend Page

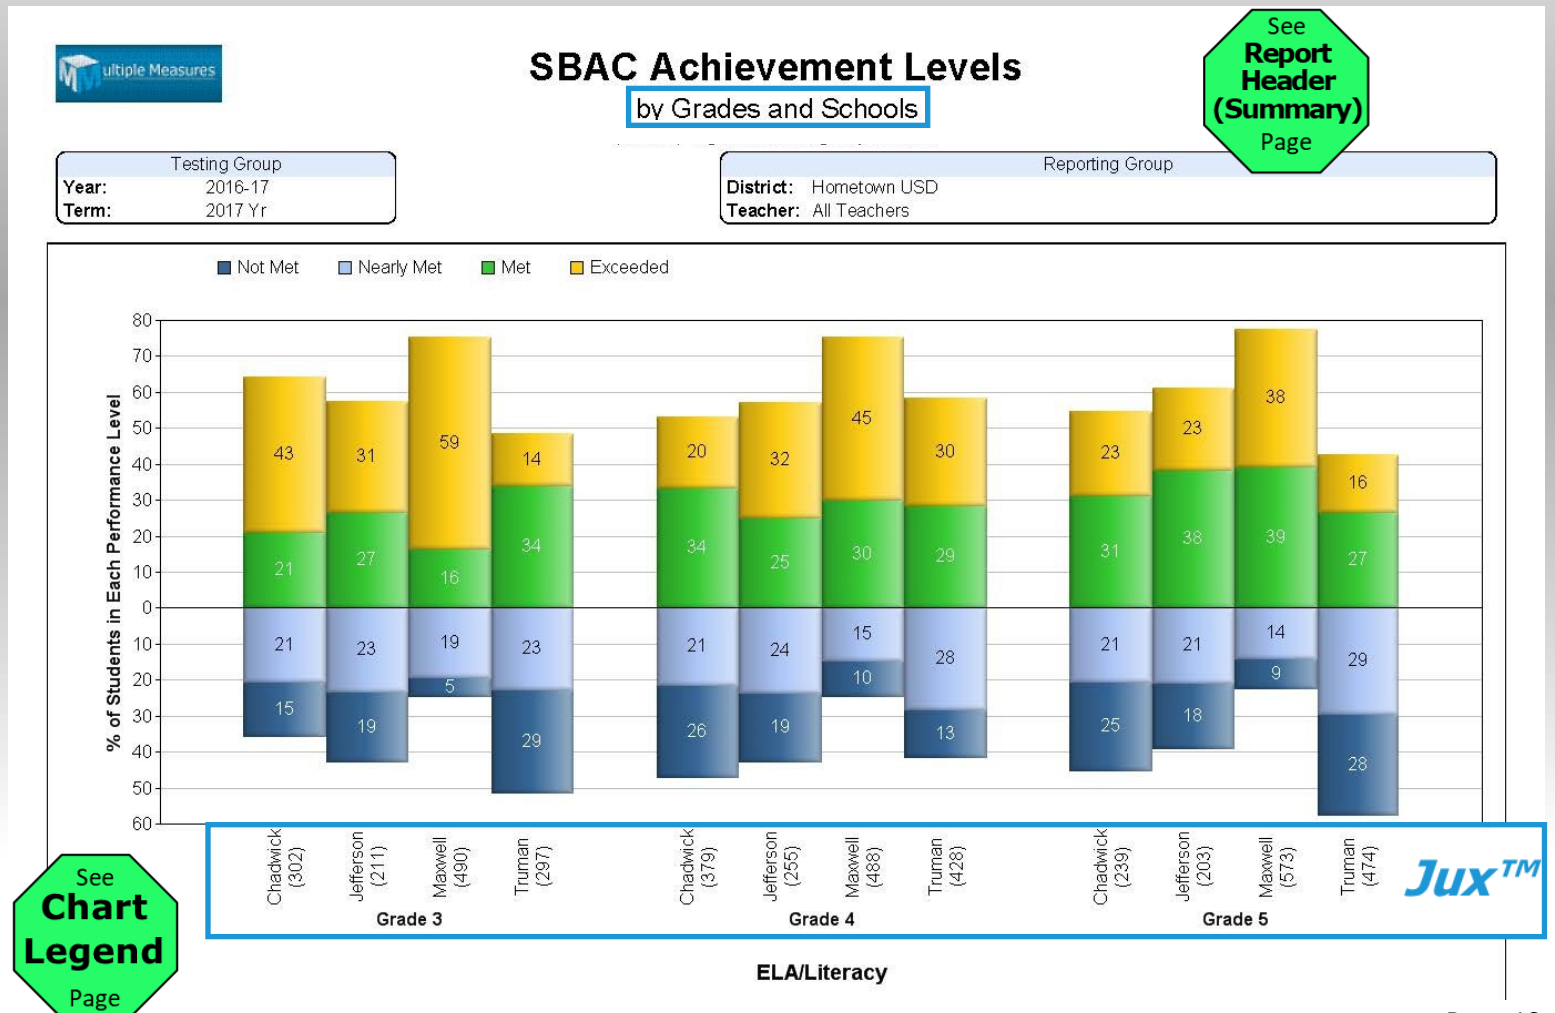

This report compares, for **each year**, the achievement of the set of students tested at **each school**.

- ❖ Achievement Levels
- ❖ Primary Jux™ = Years
- ❖ Secondary Jux™ = Schools
- ❖ Available in many Jux™ configurations by Subjects, Years, Schools, Grades, Subgroups, and Teachers

This report compares, for **each grade-level**, the achievement of the set of students tested at **each school**.

- ❖ Achievement Levels
- ❖ Primary Jux™ = Grades
- ❖ Secondary Jux™ = Schools
- ❖ Available in many Jux™ configurations by Subjects, Years, Schools, Grades, Subgroups, and Teachers

This report compares, for **each subgroup**, the achievement of the set of students tested at **each school**.

❖ Met or Exceeded Standard

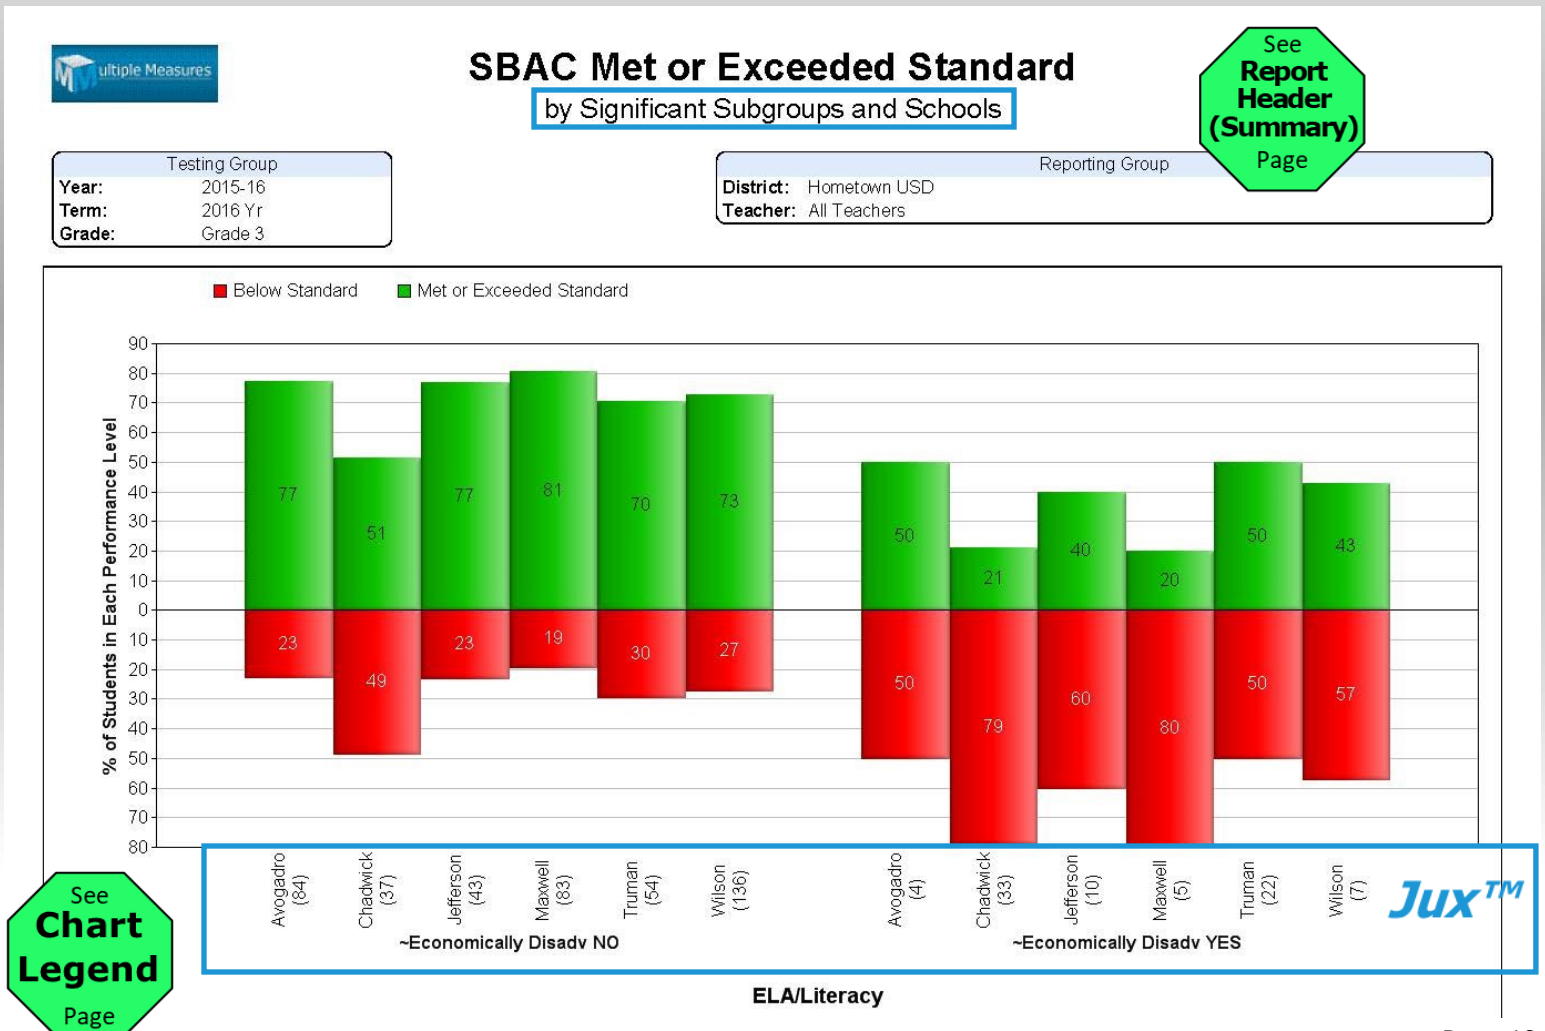

(students with a 1 or 2 are in the Red bar; students with a 3 or 4 are in the Green bar)

❖ Primary Jux™ = Subgroups

(Econ. Disadvantaged NO vs. YES)

❖ Secondary Jux™ = Schools

❖ Available in many Jux™ configurations by Subjects, Years, Schools, Grades, Subgroups, and Teachers

See **Chart Legend** Page

SBAC Multi-Year Student List with Claims

This report lists 2 years of ELA subject and claim scores for all of the students in Grade 4.

In addition to the standard SBAC scores, we provide you with computed growth metrics: FPL™, ΔFPL™, DFL3, and ΔDFL3.

❖ Student List with Claims

❖ Multiple years per student. If run as a single-year report, it can be ranked by Achievement Level score.

❖ One subject per page; multiple scores per subject; includes claim performance.

❖ With rosters, can be run by classroom, including period-by-period at secondary schools.

SBAC Multi-Subject Student List

This report lists the most recent year of ELA and Math subject scores for all of the students in Grade 4. This provides a comprehensive overview, without the claim detail.

In addition to the standard SBAC scores, we provide you with computed growth metrics: FPL™, ΔFPL™, DFL3, and ΔDFL3.

❖ Student Multi-Subject Student List

❖ Multiple years per student, if desired.

❖ Multiple subjects; multiple scores per subject; does not include claim performance.

❖ With rosters, can be run by classroom, including period-by-period at secondary schools.

SBAC Student Growth List by ± DFL3 Change

This report lists, and ranks, the change in Distance From Level 3, along with ELA subject and claim scores for all of the students in Brad Stell's 4th Grade class at Truman Elementary School.

This is a great report to provide to teachers at the beginning of the school year, showing the prior year change for all their incoming students.

❖ Student Growth List (by ± DFL3 Change)

❖ Multiple years per student. If run as a single-year report, it can be ranked by quantity of change.

❖ One subject per page; multiple scores per subject; includes claim performance.

❖ With rosters, can be run by classroom, including period-by-period at secondary schools.

SBAC Student Growth List by ± FPL™ Change

This report lists the change in Fractional Performance Level™, along with ELA subject and claim scores for all of the students in Brad Stell's 4th Grade class at Truman Elementary School. The FPL™ measures change "between the bands".

This is a great report to provide to teachers at the beginning of the school year, showing the prior year change for all their incoming students.

❖ Student Growth List (by ± FPL™ Change)

❖ Multiple years per student. If run as a single-year report, it can be ranked by quantity of change.

❖ One subject per page; multiple scores per subject; includes claim performance.

❖ With rosters, can be run by classroom, including period-by-period at secondary schools.

Growth Scores in MMARS™

(Change in) FPL™ and PD3

Multiple Measures Assessment Reporting System™

www.k12multiplemeasures.com

FPL™ Student Growth Scores in MMARS™

Fractional Performance Level™

For each student and subject, the achieved Scale Scores are interpolated between the highest and lowest obtainable scale scores (HOSS/LOSS), in their performance level band, for their grade level.

The relative position in the band is computed in hundredths.

For example, an FPL™ score of 2.68 means the student is Level 2 (nearly met) and 68% of the way to Level 3.

Smarter Balanced Scale Score Ranges

Scale score ranges for English Language Arts/Literacy and Mathematics, by Content Area, Grade Level, and Achievement Level

English Language Arts/Literacy

Grade	Minimum Scale Score	Maximum Scale Score	Achievement Level Scale Score Range for Standard Not Met	Achievement Level Scale Score Range for Standard Nearly Met	Achievement Level Scale Score Range for Standard Met	Achievement Level Scale Score Range for Standard Exceeded
3	2114	2623	2114–2366	2367–2431	2432–2489	2490–2623
4	2131	2663	2131–2415	2416–2472	2473–2532	2533–2663
5	2201	2701	2201–2441	2442–2501	2502–2581	2582–2701
6	2210	2724	2210–2456	2457–2530	2531–2617	2618–2724
7	2258	2745	2258–2478	2479–2551	2552–2648	2649–2745
8	2288	2769	2288–2486	2487–2566	2567–2667	2668–2769
11	2299	2795	2299–2492	2493–2582	2583–2681	2682–2795

Change in FPL™ (Fractional Performance Level™) computation:

- 2483 (2016, Grade 5) is in the range for Standard Nearly Met (2442-2501)
 - The span of the Nearly Met range (to the next) is (2502-2442) = 60 points
 - Alicia's score of 2483 is 41 points above the minimum for Nearly Met Standard
 - Alicia's fractional position in the Nearly Met range is 41/60, or .68
 - Alicia's FPL™ for 2015 is 2.68 - Nearly Met, plus 68% of the distance to Met Standard
- 2526 (2015, Grade 4) is in the range for Standard Met (2473-2532)
 - The span of the Met Standard range (to the next) is (2533-2473) = 60 points
 - Alicia's score of 2526 is 53 points above the minimum for Met Standard
 - Alicia's fractional position in the Met Standard range is 53/60, or .88
 - Alicia's FPL™ for 2015 is 3.88 - Met Standard, plus 88% of the distance to Exceeded
- Alicia's Change in FPL™ from 2015 to 2016 = (-1.20)

Change in PD3 (aka DF3 - Pupil Distance From Level 3) computation:

- 2483 (2016, Grade 5) is in the range for Standard Nearly Met (2442-2501)
 - Level 3 minimum is 2502
 - Alicia's score of 2483 is 19 points BELOW 2502, so her 2016 PD3 = (-19)
- 2526 (2015, Grade 4) is in the range for Standard Met (2473-2532)
 - Level 3 minimum is 2473
 - Alicia's score of 2526 is 53 points ABOVE 2473, so her 2015 PD3 is (+53)
- Alicia's Change in PD3 from 2015 to 2016 = (-72)

SBAC Fractional Performance Level™ (FPL™) Year-over-Year Change in FPL™ (ΔFPL™)

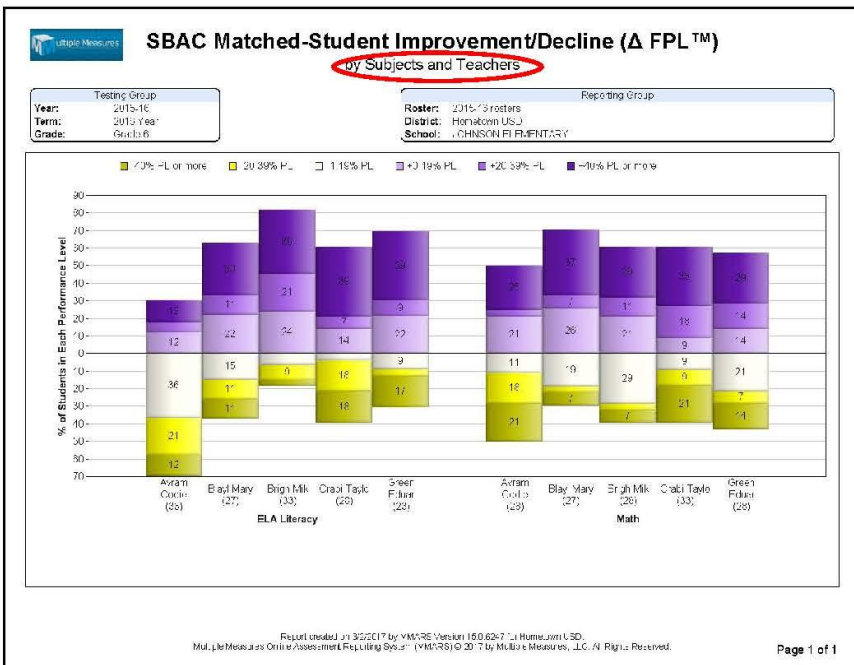

FPL™ - Fractional Performance Level™

This is our own proprietary measure, which we believe is more valuable and precise than PD3 or DF3. Since the scale score ranges differ by grade level, a certain distance from Level 3 will have slightly different meanings at, for example, Grade 4 and Grade 5. For the FPL™, we have interpolated each student's scale score between the highest and lowest obtainable scale scores, for their grade level, for their Achievement Level (1-4), and computed the fractional distance (in hundredths) of their position between the bottom and top of their band. This fraction is relative to the grade-level, and therefore comparable between grade levels. This gives you the ability to see positive and negative "movement" within achievement levels, not readily apparent when looking at a broad score of 1-4. More detail about the computational methods is available by request.

We've included some examples on this flyer, showing CHANGE. Each student is categorized into one of six bands, which represent degrees of change, both positive and negative. The summary data can be juxtaposed by all the typical Jux™ parameters. The lists can be alpha or ranked, and show the achievement level (1-4) as well as the FPL™, prior year FPL™, and change in FPL™ (ΔFPL™).

Change values allow an administrator to see the **Instructional Impact over time**, reported at the school, grade, and teacher level.

SBAC Pupil Distance From Level 3 (PD3) Year-over-Year Change in PD3 (Δ PD3)

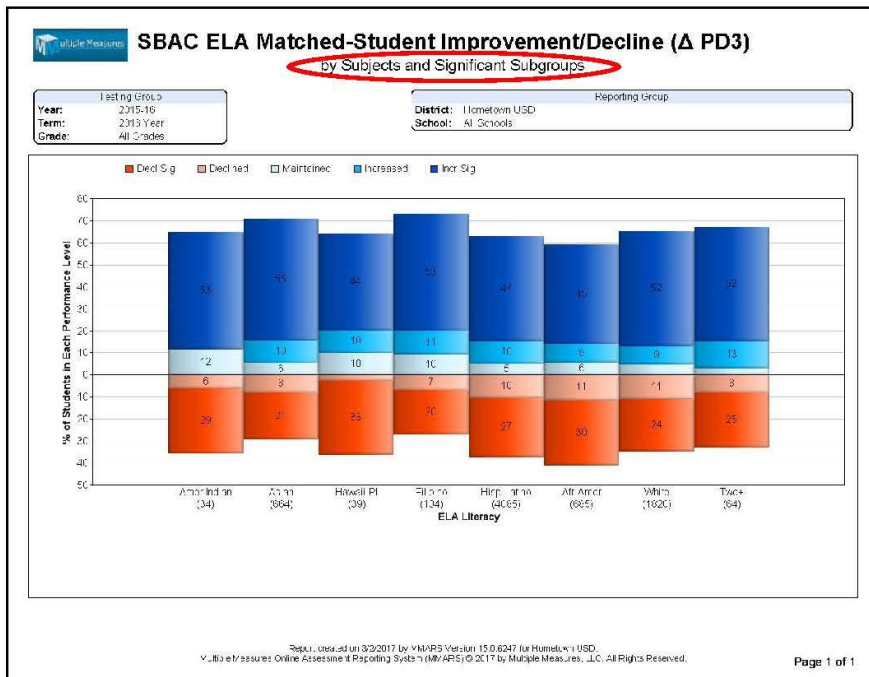

Data Visualization for ALL your assessments

PD3™ - Pupil Distance From Level 3™

- This parallels the method CDE is using for the CA Academic Indicator, but we also compute this at the pupil level, and for each group and subgroup.
- Note that our Average Point Difference (APD) summary uses the underlying PD3™ scores, and is the same metric now being computed at the school level by CCSA for Charter Schools. This differs from CDE's DF3, only in that the DF3 uses a variety of special inclusion/exclusion rules, as dictated by the State Board of Education. PD3™ does not apply exclusions; every student with scores is included.

We've included some examples on this flyer, showing CHANGE. Each student is categorized into one of five bands, using the same cut points as the CA Academic Indicator, showing degrees of change, both positive and negative. The summary data can be juxtaposed by all the typical Jux™ parameters. The lists can be alpha or ranked, and show the achievement level (1-4) as well as the PD3™, prior year PD3™, and change in PD3™ (Δ PD3™).

Change values allow an administrator to see the **Instructional Impact over time**, reported at the school, grade, and teacher level.
